

Access control & screening

Practice good hygiene

Since the College has open doors for the first load of staff members, the College has been following the guidelines and protocols of COVID-19. This includes regularly washing hands, sanitization, social distancing and compulsory screening at the college entrance. The screening at the entrance and access control started on the 18th May following the decision of the management to start with the process of planning. The management set a high powered, trained and well equipped team to execute the screen for all staff members.

Screening starts with the testing the temperature followed by filling the screening questionnaire and sanitization. All this is done before an individual can access the College premises. Subsequent to screening individual are subjected to brief education around COVID-19 and fill the register that will allow the College to trace the individual in case of any infection dedected. The College is confident that it is fast moving towards making sure that when the full complement of staff and students arrive all systems will be set to go.
